

DCCN 1998 Index

Volume 17

Number 1 (January/February)—pp. 1-56

Number 2 (March/April)—pp. 57-112

Number 3 (May/June)—pp. 113-168

Number 4 (July/August)—pp. 169-224

Number 5 (September/October)—pp. 225-280

Number 6 (November/December)—pp. 281-336

AUTHOR INDEX

- Adams MH, Lammon CB, Stover LM. Responding to tricyclic antidepressant overdose; 67.
- Andrews JO. QI project to reduce nosocomial blood loss; 92.
- Artnak KE, Wilkinson SS. Fulminant hepatic failure in acute acetaminophen overdose; 135.
- Barr WJ, Bush HA. Four factors of nurse caring in the ICU; 214.
- Carlson B, Riegel B, Thomason T. Visitation: Policy versus practice; 40.
- Caruana M, Culp K. Intrahospital transport of the critically ill adult: A research review and implications; 146.
- Cathelyn JL, Samples DA. $S\dot{V}O_2$ monitoring: Tool for evaluating patient outcomes; 58.
- Chaplik S, Neafsey PJ. Pre-existing variables and outcome of cardiac arrest resuscitation in hospitalized patients; 200.
- Cooper M, Powers K, Rusnack R, Conley K, Epperly N. Cyanide ingestion: Preventing the cascade; 83.
- Crumlish CM. Coping strategies of cardiac surgery patients in the perioperative period; 272.
- DeJong MJ, Morton PG. Patients at risk for atrial dysrhythmias after coronary bypass grafting; 114.
- Drew K, Brayton M, Ambrose A, Bernard G. End-tidal carbon dioxide monitoring for weaning patients: A pilot study; 127.
- Duke J, Murphy B, Bell A. Nurses' attitudes toward organ donation: An Australian perspective; 264.
- Eisenberg AA, Redick EL. Transsphenoidal resection of pituitary adenoma: Using a critical pathway; 306.
- Ellis MF. Atrial fibrillation following cardiac surgery; 226.
- Freichels TA. Managing mechanical ventilation in status asthmaticus; 2.
- Gregoire AS, Fitzpatrick ER. Esophageal cancer: Multisystem nursing management; 28.
- Hoffmann RL, Reeder SJ. Angiotensin-converting enzyme inhibitors and left ventricular remodeling; 256.
- Johnson SH. We have a beautiful ICU!; 145.
- Keely BR. Recognition and treatment of autonomic dysreflexia; 170.
- Oermann MH. How to assess critical thinking in clinical practice; 322.
- Reeder SJ, Hoffmann R. Prognosis for women after an acute myocardial infarction: Recommendations for practice; 75.
- Reisinger PB. Experiences of critical care nurses in telephone triage positions; 20.
- Richiuso N. Accuracy of aPTT values drawn from heparinized arterial lines in children; 14.
- Sampson BK, Doran KA. Anticipating coronary artery bypass patient health needs at discharge; 166.
- Scordo KA. Mitral valve prolapse syndrome: Interventions for symptom control; 177.
- Sinclair S. Dispelling myths of capnography; 48.
- Stoeckle ML, Doorley JE, McArdle RM. Identifying compliance with end-of-life care decision protocols; 314.
- Twibell RS. Family coping during critical illness; 100.
- Voepel-Lewis T, Malviya S. Managing sedation in critically ill children; 298.
- Walton J. Nursing interventions to reduce perioperative cardiac morbidity and mortality; 282.
- Witek-Janusek L, Cusack C, Mathews HL. *Candida albicans*: An opportunistic threat to critically ill low birth weight infants; 243.
- Witek-Janusek L, Stoddard J, Mathews HL. Trauma-induced immune dysfunction: A challenge for critical care; 187.

SUBJECT INDEX

Acetaminophen overdose

Fulminant hepatic failure in acute acetaminophen overdose; 135.

Advanced practice nursing

Fulminant hepatic failure in acute acetaminophen overdose; 135.

Advanced technology

Managing mechanical ventilation in status asthmaticus; 2.

Applied pathophysiology

Candida albicans: An opportunistic threat to critically ill low birth weight infants; 243.

SUBJECT INDEX

Acetaminophen overdose

Fulminant hepatic failure in acute acetaminophen overdose; 135.

Advanced practice nursing

Fulminant hepatic failure in acute acetaminophen overdose; 135.

Advanced technology

Managing mechanical ventilation in status asthmaticus; 2.

Applied pathophysiology

Candida albicans: An opportunistic threat to critically ill low birth weight infants; 243.

Mitral valve prolapse syndrome: Interventions for symptom control; 177.

Trauma-induced immune dysfunction: A challenge for critical care; 187.

Applied pharmacology

Angiotensin-converting enzyme inhibitors and left ventricular remodeling; 256.

Managing sedation in critically ill children; 298.

Responding to tricyclic antidepressant overdose; 67.

Applied research

Accuracy of aPTT values drawn from heparinized arterial lines in children; 14.

Coping strategies of cardiac surgery patients in the perioperative period; 272.

End-tidal carbon dioxide monitoring for weaning patients: A pilot study; 127.

Experiences of critical care nurses in telephone triage positions; 20.

Family coping during critical illness; 100.

Four factors of nurse caring in the ICU; 214.

Health needs of coronary artery bypass graft surgery patients at discharge; 158.

Nurses' attitudes toward organ donation: An Australian perspective; 264.

Pre-existing variables and outcome of cardiac arrest resuscitation in hospitalized patients; 200.

Visitation: Policy versus practice; 40.

Assessment

End-tidal carbon dioxide monitoring for weaning patients: A pilot study; 127.

S_{VO₂} monitoring: Tool for evaluating patient outcomes; 58.

Autonomic dysreflexia

Recognition and treatment of autonomic dysreflexia; 170.

Cardiac

Angiotensin-converting enzyme in-

hibitors and left ventricular remodeling; 256.

Anticipating coronary artery bypass patient health needs at discharge; 166.

Atrial fibrillation following cardiac surgery; 226.

Health needs of coronary artery bypass graft surgery patients at discharge; 158.

Mitral valve prolapse syndrome: Interventions for symptom control; 177.

Nursing interventions to reduce perioperative cardiac morbidity and mortality; 282.

Patients at risk for atrial dysrhythmias after coronary bypass grafting; 114.

Pre-existing variables and outcome of cardiac arrest resuscitation in hospitalized patients; 200.

Prognosis for women after an acute myocardial infarction: Recommendations for practice; 75.

Reviewing cardiac arrest outcomes; 209.

Caring

Four factors of nurse caring in the ICU; 214.

Challenging diagnosis

Esophageal cancer: Multisystem nursing management; 28.

Complications

Intrahospital transport of the critically ill adult: A research review and implications; 146.

Transsphenoidal resection of pituitary adenoma: Using a critical pathway; 306.

Coping

Coping strategies of cardiac surgery patients in the perioperative period; 272.

Family coping during critical illness; 100.

Critical thinking

How to assess critical thinking in clinical practice; 322.

Cyanide ingestion

Cyanide ingestion: Preventing the cascade; 83.

Discharge

Anticipating coronary artery bypass patient health needs at discharge; 166.

Health needs of coronary artery bypass graft surgery patients at discharge; 158.

Editorial

We have a beautiful ICU!; 145.

Education STATPack

Anticipating coronary artery bypass patient health needs at discharge; 166.

Atrial fibrillation following cardiac surgery; 226.

Monitoring mixed venous oxygen saturation (S_{VO₂}); 65.

Principles of mechanical ventilation in status asthmaticus; 12.

Reducing perioperative cardiac morbidity and mortality; 282.

Reviewing cardiac arrest outcomes; 209.

Education strategies

Dispelling myths of capnography; 48.

End-of-life care

Identifying compliance with end-of-life care decision protocols; 314.

Family

Family coping during critical illness; 100.

Four factors of nurse caring in the ICU; 214.

Hemodynamics

Accuracy of aPTT values drawn from heparinized arterial lines in children; 14.

Angiotensin-converting enzyme inhibitors and left ventricular remodeling; 256.

Monitoring mixed venous oxygen saturation (S_{VO₂}); 65.

Nursing interventions to reduce perioperative cardiac morbidity and mortality; 282.

S_{VO₂} monitoring: Tool for evaluating patient outcomes; 58.

Immune dysfunction

Trauma-induced immune dysfunction:
A challenge for critical care; 187.

Immunology

Candida albicans: An opportunistic threat to critically ill low birth weight infants; 243.

Management

Identifying compliance with end-of-life care decision protocols; 314.

QI project to reduce nosocomial blood loss; 92.

Visitation: Policy versus practice; 40.

Mechanical ventilation

Managing mechanical ventilation in status asthmaticus; 2.

Principles of mechanical ventilation in status asthmaticus; 12.

Medical

Cyanide ingestion: Preventing the cascade; 83.

Dispelling myths of capnography; 48.

Esophageal cancer: Multisystem nursing management; 28.

Fulminant hepatic failure in acute acetaminophen overdose; 135.

Recognition and treatment of autonomic dysreflexia; 170.

Responding to tricyclic antidepressant overdose; 67.

Myocardial infarction

Prognosis for women after an acute myocardial infarction: Recommendations for practice; 75.

Oncology

Esophageal cancer: Multisystem nursing management; 28.

Transsphenoidal resection of pituitary adenoma: Using a critical pathway; 306.

Organ donation

Nurses' attitudes toward organ donation: An Australian perspective; 264.

Outcomes

Pre-existing variables and outcome of cardiac arrest resuscitation in hospitalized patients; 200.

Reviewing cardiac arrest outcomes; 209.

Pediatric

Accuracy of aPTT values drawn from heparinized arterial lines in children; 14.

Candida albicans: An opportunistic threat to critically ill low birth weight infants; 243.

Managing sedation in critically ill children; 298.

Preventing complications

Cyanide ingestion: Preventing the cascade; 83.

Recognition and treatment of autonomic dysreflexia; 170.

Transsphenoidal resection of pituitary adenoma: Using a critical pathway; 306.

Quality improvement

QI project to reduce nosocomial blood loss; 92.

Research analysis

Intrahospital transport of the critically ill adult: A research review and implications; 146.

Nursing interventions to reduce perioperative cardiac morbidity and mortality; 282.

Patients at risk for atrial dysrhythmias after coronary bypass grafting; 114.

Prognosis for women after an acute myocardial infarction: Recommendations for practice; 75.

Respiratory

Dispelling myths of capnography; 48.

End-tidal carbon dioxide monitoring for weaning patients: A pilot study; 127.

Managing mechanical ventilation in status asthmaticus; 2.

Monitoring mixed venous oxygen saturation (S_{vO_2}); 65.

Principles of mechanical ventilation in status asthmaticus; 12.

S_{vO_2} monitoring: Tool for evaluating patient outcomes; 58.

Standards of care

Identifying compliance with end-of-life care decision protocols; 314.

QI project to reduce nosocomial

blood loss; 92.

Surgical

Atrial fibrillation following cardiac surgery; 226.

Coping strategies of cardiac surgery patients in the perioperative period; 272.

Mitral valve prolapse syndrome: Interventions for symptom control; 177.

Nursing interventions to reduce perioperative cardiac morbidity and mortality; 282.

Patients at risk for atrial dysrhythmias after coronary bypass grafting; 114.

Transport

Intrahospital transport of the critically ill adult: A research review and implications; 146.

Trauma

Trauma-induced immune dysfunction: A challenge for critical care; 187.

Triage

Experiences of critical care nurses in telephone triage positions; 20.

Tricyclic overdose

Responding to tricyclic antidepressant overdose; 67.

Visitation

Visitation: Policy versus practice; 40.
